This safety and coach vessel is available for all clubs and groups actively participating in NQ Sailing. A rental will be charged based on \$50 per day plus all fuel and consumables. Any damage to the vessel or equipment is the responsibility of the user and must be rectified as a condition of rental/useage. A damage deposit may be charged by NQ Sailing.

The vessel is commercially registered in Queensland and must only be operated by a Coxswain or if used recreationally by a holder of the Recreational Ship Masters Licence with TL3 and Rescue Boat Endorsement.

The vessel has a four stroke engine which operates on unleaded, or premium unleaded fuel if available. Do NOT mix outboard oil with the fuel. The engine has an oil tank under the cowling and as part of the pre-usage checks the engine oil must be checked.

When travelling with the vessel deflate the 4 air pontoons as the air pressure will increase with heat which can damage the pontoons.

Avoid rocks, hard objects and sharp items which may damage the pontoons.

Any club, association or user wishing to use the vessel should contact Chris White in the first instance.

The vessel may be utilised for isolated events such as regatta's training or coaching situations or in some instances for longer term use with adequate justification of the benefits for sailing in our region.
